

Accelerating drug discovery in Japan

The eMolecules' platform is designed by chemists for chemists.

Visit the eMolecules Booth at the 42nd Medicinal Chemistry Symposium to discover the world's largest collection of chemical building blocks – available in Japan exclusively through Kishida.

KISHIDA

FIND

eMol catalog

YOUR library

Search eMolecules' catalog and your collection and find the required compounds in the amount you need

ORDER

Place one order for all compounds

REFORMAT

Request transfer of compounds into any weight, concentration, or customer-specific container

RECEIVE

Global delivery

SYNTHESIZE

new compounds

Rapid virtual hit synthesis, connecting automated synthesis and digital chemical space with real tractable molecules

Access trillions of virtual compounds

Instantly search, compare, and select building blocks

Order synthesized compounds or building blocks directly

Seamlessly integrated into drug discovery workflows
